Overview

Professional 200m Well Drilling Rig

This robust 200m well drilling rig is engineered for efficiency and reliability in diverse soil conditions. Designed with portability and ease of use in mind, it features a compact footprint that allows for straightforward transportation and maneuverability on various job sites. Ideal for water well drilling and geological exploration, this unit provides the consistent performance and durability required for professional drilling projects.

Performance Metrics

Drilling Depth

200 m
Max Depth

Drilling Diameter: 300 mm

Drilling Angle Range: 90°-75°

Technical Specifications

End Diameter: 75 mm

Drilling Pipe Diameter: 50 mm

Physical Dimensions

Machine Weight (Excluding Power): 975 kg

Unit Dimensions (L x W x H): 2.75m x 0.95m x 1.6m

Applications

Primary Applications: Water Well Drilling, Geological Exploration
