

200m3 Horizontal Chemical Storage Tank

This 200m3 horizontal tank is engineered for the storage of chemicals. It features a cylindrical design and is equipped with safety and access features.

Product Overview

Industrial Storage Solution

This 200m3 horizontal storage tank is engineered specifically for the secure containment of industrial chemicals. Its robust cylindrical design ensures structural integrity for large-scale storage applications. The unit is optimized for transportation and deployment, featuring integrated safety access points for operational efficiency.

Technical Specifications

Total Capacity

200 m3

Volume

Tank Orientation

Horizontal

Primary Use

Chemical Storage, Industrial Processing, Land-based Storage

Design & Features

Key Features

- Cylindrical body design
- Integrated safety access points
- Heavy-duty transport mounting
