

200ml Bottle Mould

This precision-engineered mould is designed for manufacturing 200ml bottles. It incorporates intricate cooling channels for efficient heat dissipation during the molding process, ensuring high-quality bottle production.

Product Overview

Precision Engineering for High-Volume Production

This precision-engineered mould is specifically designed for the manufacturing of 200ml bottles. Constructed from high-grade tool steel, the mould ensures exceptional durability and consistent performance in demanding high-volume production environments. It features optimized surface finishes for efficient bottle release and reduced cycle times, making it a reliable solution for streamlined manufacturing.

Technical Specifications

Bottle Capacity	200 ml
Material Construction	High-grade tool steel
Cooling System	Yes
Machine Compatibility	Standard injection molding machines

Performance Features

Key Features

- Precision-engineered core and cavity sections
- Intricate cooling channels for heat dissipation
- Optimized surface finish for easy release
- Designed for high-volume production cycles
