

200mm Impulse Heat Sealer

This 200mm impulse sealer is a compact heat sealing machine designed for sealing thermo-plastic materials. It features an adjustable timer to control sealing time, ensuring optimal sealing for different material thicknesses.

Product Overview

Compact Impulse Heat Sealer

This 200mm impulse heat sealer is a compact and efficient solution designed for sealing various thermoplastic materials. It features an adjustable timer to control sealing duration, ensuring optimal results for different material thicknesses. Ideal for packaging food, electronics, and small goods, this lightweight device provides a secure, airtight seal while maintaining energy efficiency by only consuming power during the active sealing process.

Technical Specifications

Power Consumption

200 W

Power

Sealing Length	200 mm
Sealing Width	2 mm
Voltage/Frequency	220-240V ~50Hz

Features

Key Capabilities

- Adjustable sealing timer
- Airtight sealing mechanism
- Energy-efficient operation
- Lightweight and portable design

Suitable Applications	Food Packaging, Electronics, Small Retail, General Packaging
-----------------------	--
