

# 200W Solar Street Light

This 200W solar street light offers efficient and sustainable outdoor illumination. The robust lighting solution uses solar energy to provide reliable and cost-effective lighting for streets, pathways, and public areas.

## ADDITIONAL IMAGES

## Product Overview

### Sustainable Outdoor Illumination

This high-performance 200W solar street light is engineered for efficient and sustainable outdoor lighting, perfect for streets, pathways, and public areas. Featuring a robust, weather-resistant construction and high-efficiency LED modules, it provides reliable light while minimizing energy consumption. The integrated intelligent energy management system ensures optimal performance and longevity with minimal maintenance requirements.

## Technical Specifications

### Rated Power

**200 W**

Total Power Output

### Core Features

Solar Powered, Weather-Resistant, High-Efficiency LED, Intelligent Energy Management

## Application & Usage

### Recommended Applications

- Public streets and roadways
- Parking lots
- Public pedestrian pathways
- General outdoor public spaces

### Maintenance Requirements

Low Maintenance
