

# 200W Square RGBW LED Flood Light

This square flood light features a high-quality aluminum magnesium alloy housing for excellent heat dissipation. Its modular design ensures a compact form factor and easy installation in diverse locations.

## ADDITIONAL IMAGES

## Product Overview

### Professional RGBW LED Flood Lighting

This 200W square LED flood light is engineered with high-quality aluminum magnesium alloy for superior heat dissipation and durability. Its modular, compact design facilitates easy installation across various outdoor environments, including billboards, building facades, and landscapes. Featuring customizable RGBW color capabilities and multiple beam angle options, this fixture offers professional-grade illumination controlled by a central controller to meet specific project requirements.

## Technical Specifications

### Rated Power

**200 W**

Power Consumption

### Available Beam Angles

- 8°
- 15°
- 30°
- 45°
- 60°

Operational Lifespan

50000 hours

Lighting Type

RGBW, White Light

## Construction & Design

### Key Design Features

Modular Design • Weather-Sealed • Excellent Heat Dissipation

### Housing Material

Aluminum Magnesium Alloy

## Applications

### Typical Applications

- Building decoration
- Billboard illumination
- Green park lighting
- Architectural highlighting
