

203mm Aperture 1000mm Focal Length Refractor Telescope

This refractor telescope features a 203mm aperture and 1000mm focal length, providing high-resolution images for astronomical observation. It comes equipped with an EM10 equatorial mount, TP10 aluminum stand, 8x50 finder scope, and PL4, PL12.5, and PL25 eyepieces.

Overview

Professional Refractor Telescope

This high-performance 203mm aperture refractor telescope is engineered for precise astronomical observation. With a substantial 1000mm focal length, it delivers sharp, detailed views of deep-sky objects and planetary features. The included EM10 equatorial mount ensures stable tracking, while the comprehensive eyepiece kit offers versatile magnification options for varied viewing conditions.

Optical Performance

Aperture	203 mm
Focal Length	1000 mm
Finder Scope	8X50

Accessories

Included Eyepieces

- PL4
- PL12.5
- PL25

Magnification Lens	2X increasing lens
--------------------	--------------------

Mount & Tripod

Equatorial Mount	EM10
Tripod Material	TP10 Aluminium
