

# 208cc 4-Stroke Gasoline Engine

This single-cylinder gasoline engine features an OHV design and forced air cooling. It is a 4-stroke engine suitable for various applications.

## Product Overview

### High-Efficiency 208cc Power Unit

This 208cc 4-stroke gasoline engine is engineered for versatility and reliability in demanding environments. Featuring an overhead valve (OHV) design and forced air cooling, it delivers consistent performance while maintaining optimal operating temperatures. Its robust construction, including a durable cast iron cylinder sleeve, makes it an ideal power source for generators, water pumps, and agricultural machinery.

## Technical Specifications

### Displacement

**208 cc**

Displacement

Engine Type	4-Stroke, Single Cylinder
Valve Design	OHV (Overhead Valve)
Cooling System	Forced Air Cooling

## Features

Key Features	OHV Design, Cast Iron Cylinder Sleeve, Recoil Starter, Forced Air Cooling
--------------	---

## Applications

### Suitable Applications

- Generators
- Water Pumps
- Agricultural Equipment
