Overview

High-Performance 4-Stroke Engine

This 4-stroke OHV engine is engineered for versatility and reliability in demanding environments. Featuring a robust displacement and optimized compression ratio, it delivers consistent power for a variety of small machinery applications. Designed for efficiency and ease of maintenance, this unit is an ideal power solution for generators, water pumps, and other industrial or commercial equipment.

Performance

Maximum Output

7 hp

Max Output

3600 rpm

at

Maximum Torque

13.5 N.m

Max Torque

2500 rpm

Technical Specifications

Displacement	212 cc
Bore x Stroke	70x55 mm
Compression Ratio	8.5:1

Capacity & Dimensions

Tank Capacities

Type	Capacity
Fuel Tank	3.6 L
Oil Capacity	0.6 L

Dimensions (LxWxH) 400x345x380 mm

Weight (G.W/N.W) 16/15 kg
