

2.0G Reverse Osmosis Water Storage Tank

This reverse osmosis water storage tank is designed for use with RO water filtration systems. It features a durable construction and provides reliable water storage.

Overview

Reliable RO Water Storage

This 2.0G reverse osmosis water storage tank is engineered for seamless integration with RO water filtration systems. Designed for durability and consistent performance, it ensures reliable water storage and delivery for residential or commercial purification setups. Its robust construction supports a maximum working pressure of 100 psi, making it a dependable component for your water treatment infrastructure.

Technical Specifications

Available Capacity Range

- 2.0G
- 3.0G
- 3.2G
- 4.0G

Tank Capacity	2 G
Maximum Working Pressure	100 psi
Recommended Air Charge	5-7 psi

Product Details

SKU	6 945377500057
Compatible Product Types	RO Water Storage Tank, RO Water Pressure Tank, Plastic Water Tank, RO Water Dispenser, RO Water Purifier, UF Water Dispenser
