

20HP Gasoline Engine for Industrial Power

This 20HP gasoline engine is designed for power generation and industrial use. It features a durable construction and efficient combustion system for optimal performance and longevity.

Product Overview

Industrial Power Performance

The EM630 is a robust and reliable gasoline engine engineered specifically for power generation and demanding industrial applications. With a 20HP output and an efficient OHV (Overhead Valve) combustion system, this engine is built for durability and consistent performance in challenging environments. It is an ideal power source for heavy-duty equipment, including generators and water pumps, offering both ease of maintenance and dependable operation.

Technical Specifications

Rated Power

20 HP

Power Output

Engine Technology

OHV • Gasoline

Model Identifier

EM630

Features

Core Features

- High-capacity fuel tank
- Easy start mechanism
- Low emission output
- Durable heavy-duty construction

Applications

Suitable Applications

Power Generation, Water Pumps, Industrial Machinery, Heavy-duty Equipment
