

20kW Silent Diesel Generator (69dB)

This 20kW diesel generator is water-cooled and designed for heavy-duty use. Operating at a low noise level of 69dB, it is ideal for providing reliable power in noise-sensitive environments.

Overview

High-Performance Silent Power Solution

This heavy-duty 20kW diesel generator is engineered for reliable power delivery in noise-sensitive environments. Featuring an advanced water-cooled system and double noise-reduction technology, it ensures efficient thermal management and a low operational sound pressure of 69dB. Its compact, smart frame design includes integrated forklift pockets, making it an ideal choice for versatile prime or standby power applications.

Technical Specifications

Rated Power Output

20 kW

Power Capacity

Noise Level

69 dB

Sound Pressure

Cooling System

Water-cooled

Design & Features

Usability & Control

- Digital control system
- Intuitive control panel
- Built-in performance monitoring
- Forklift pockets for easy transport

Noise Reduction Tech

- Double noise-reduction technology
- High efficient sound insulation canopy
- Unique air system

Key Features

Ultra Silent, Water-Cooled, Heavy Duty, Compact Design
