

20kW Triple Phase Solar Inverter with DC/WiFi/GPRS

This 20kW triple-phase solar inverter is designed for home solar systems. It supports DC input, WiFi connectivity, and GPRS for remote monitoring and control.

Product Overview

High-Performance Solar Conversion

This 20kW triple-phase solar inverter is engineered for residential solar power systems, providing reliable energy conversion. It features integrated support for DC input and advanced connectivity options, including WiFi and GPRS, for seamless remote monitoring and management. Designed for efficiency, this unit serves as an essential component for modern home solar setups and UPS applications.

Technical Specifications

Rated Power Output

20 kW

Output Power

Phase Configuration

Triple Phase

Connectivity & Features

Suitable Applications

- Home Solar Systems
- UPS (Uninterruptible Power Supply)

Connectivity

WiFi, GPRS
