

## 20L Portable Thermoelectric Mini Fridge

This 20L mini fridge utilizes thermoelectric cooling to keep items chilled. It can also warm items, making it versatile for various needs.

### ADDITIONAL IMAGES

### Overview

#### Compact Cooling & Heating Solution

This 20L portable mini fridge offers a versatile solution for both cooling and heating needs, making it perfect for travel, office, or personal use. Utilizing advanced semiconductor refrigeration technology and high-density EPS insulation, it ensures efficient temperature management. With dual power compatibility for both DC and AC sources, this unit provides reliable performance in a variety of environments.

### Technical Specifications

Item Number	AQ-20L
Refrigeration Principle	Semiconductor Refrigeration

### Performance

#### Cooling Performance

**3 °C**  
Cooling Temperature

Heating Temperature	50-60°C
---------------------	---------

## Power & Electrical

### Cable Lengths

Cable Type	Length
Car Charger Cable	2m
Household Cable	1.8m

Power Compatibility	DC 12V, AC 100V-240V
---------------------	----------------------

Power Consumption	78 W
-------------------	------

## Construction

Insulation Material	High density EPS
---------------------	------------------

Capacity	20 L
