

20V Cordless Angle Grinder 4-1/2 Inch with Brushless Motor

This 20V cordless angle grinder features a brushless motor for enhanced performance and durability. It is designed for grinding, cutting, and polishing various materials with a 4-1/2 inch grinding wheel.

Overview

High-Performance Cordless Grinding

This 20V cordless angle grinder features an advanced brushless motor designed for high efficiency, extended endurance, and low noise operation. Engineered for professional use, it includes robust safety features such as overload protection, rotation-blocking protection, and a soft start mechanism with a brake function. The durable aluminum alloy gear housing and dust-proof motor structure ensure long-term reliability in demanding work environments.

Technical Specifications

Nominal Voltage	18 V
Maximum Initial Battery Voltage	20 V
Battery Capacity	4 Ah
Grinding Wheel Capacity	4-1/2 inch

Key Features

Motor Technology

Brushless Motor • High Efficiency • Low Noise

Safety Systems

- Soft Start and Brake Function
- Overload Protection
- Rotation-blocking Protection
- Power-off Protection

Design Highlights

- 360° Angle Adjustment
- Aluminum Alloy Gear Housing
- Dust-proof Motor Structure
- Removable Dust-proof Inlet Cover

Included Items

Included Packaging	Blow Molded Case (BMC)
