

# 20V Cordless Brushless Drywall Sander

This 20V drywall sander is designed for sanding drywall surfaces. It features a brushless motor for enhanced performance and extended lifespan, while its cordless design provides freedom of movement.

## Product Overview

### Professional Cordless Performance

This 20V cordless drywall sander is engineered for efficiency and precision, featuring a robust 5030# brushless motor that ensures a longer lifespan and reliable power. Designed for professional use, it includes an integrated auto-vacuum system to maintain a clean workspace and an LED work light for visibility in low-light conditions. The variable speed control and ergonomic design provide the control and comfort required for demanding sanding tasks.

## Technical Specifications

### No Load Speed

**800 Rpm**

Min Speed

**2400 Rpm**

Max Speed

Motor Type	5030# Brushless
Voltage	20 V
Sanding Motion	Rotation
Battery Capacity	1500 mAh

## Features

### Key Features
