Product Overview

Versatile Cordless Performance

This 20V cordless heat gun is engineered for versatility and portability, making it an essential tool for heat shrinking, paint removal, loosening rusted bolts, and thawing frozen pipes. Its ergonomic, lightweight design ensures comfortable handling during prolonged professional or DIY tasks, while the consistent heat output guarantees precise results. Built with safety in mind, it includes thermal overload protection to prevent damage and ensure user security.

Technical Specifications

Voltage	20 V
Power Source	20V MAX PLUS Battery
Battery Capacity	2.0Ah

Features

Common Applications

- Heat shrinking
- Paint removal
- Loosening rusted bolts
- Thawing frozen pipes

Key Features

Cordless, Thermal Overload Protection, LED Work Light, Ergonomic Design
