

20V Cordless Portable Fan

This portable fan is powered by a 20V lithium-ion battery for cordless convenience. It features an adjustable fan head and multiple speed settings for customizable comfort.

Overview

Professional Cordless Cooling Solution

This 20V cordless portable fan is engineered for high-performance cooling in demanding environments like workshops, garages, and job sites. Featuring a durable design and an adjustable 360-degree tilt head, it provides customizable airflow exactly where you need it. The efficient lithium-ion battery system ensures reliable, cordless operation with extended runtimes for all-day use.
