

# 20V Cordless Reciprocating Saw for Wood and Metal

The 20V Cordless Reciprocating Saw is a versatile tool for cutting through various materials. Its ergonomic design ensures comfortable handling, while the tool-free blade change system allows for quick and easy blade replacements.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Cordless Cutting Power

This 20V cordless reciprocating saw is engineered for versatility and efficiency in demanding cutting tasks. Featuring a high-performance motor and variable speed control, it provides the precision needed for wood, metal, and plastic applications. The ergonomic, compact design ensures comfortable handling and maneuverability, making it an ideal choice for demolition, remodeling, and general construction projects.

## Technical Specifications

Voltage	20 V
Battery Capacity	2 Ah
Speed Control	Variable speed control
Blade Change System	Tool-free

## Features

### Key Features

- Ergonomic handle for reduced fatigue
- Compact design for tight spaces
- Pivoting shoe for stability
- Compatible with standard reciprocating blades

Compatible Materials	Wood, Metal, Plastic
----------------------	----------------------

## Applications

### Primary Applications

Demolition • Remodeling • General Construction
