

20V Cordless Reciprocating Saw

This 20V cordless reciprocating saw is designed for cutting through various materials. It is powered by a 20V MAX lithium-ion battery, offering cordless convenience and portability.

Product Overview

Professional Cordless Performance

This 20V Cordless Reciprocating Saw is engineered for versatility and power, making it an essential tool for demolition, remodeling, and general cutting tasks. Powered by a 20V MAX lithium-ion battery, it provides the cordless convenience needed for job site mobility. The ergonomic design, featuring overmold grips and variable speed control, ensures enhanced user control and reduced fatigue during extended operation.

Key Features

Design & Ergonomics

Overmold Grip, Pivoting Shoe, Variable Speed Control, Toolless Blade Change

Technical Specifications

Control

- Variable speed control
- Adjustable pivoting shoe
- Overmold front grip

Power Source

20V MAX Lithium-Ion

Blade Mechanism

Toolless clamp
