Overview

High-Performance Cordless Jigsaw

This 20V Max cordless jigsaw features an advanced brushless motor, delivering superior efficiency, extended tool life, and quiet operation. Designed for professional precision, it includes a tool-free blade change system and variable speed control to adapt to various cutting materials. The ergonomic design is complemented by safety features such as power failure protection and integrated dust management, making it an essential tool for demanding cutting tasks.

Power & Performance

Motor Technology

Brushless Motor

Voltage Specifications

20 V

Max Voltage

18 V

Nominal Voltage

Features

Key Features

- Integrated LED work light
- Quick-change saw blade system
- Variable speed control
- Dust suction and management
- Lifting tool function
- Power failure protection

Safety & Battery

Battery Protection

Short Circuit Protection, Capacity Indicator, Power Failure Protection

Package Contents

Storage

Blow Molded Case (BMC)
