

20W Fiber Laser Metal Marking Machine

This fiber laser marking machine is configured with 20W of fiber laser power and a high-speed galvo scanner. It offers a 100x100mm marking area for metal applications.

Product Overview

High-Precision Fiber Laser Marking

This 20W fiber laser marking machine is engineered for high-precision engraving and marking on various metal surfaces. The system features a compact, integrated workstation design that includes a dedicated monitor, control panel, and an enclosed cabinet for enhanced operational safety and organization. It is an ideal solution for industrial marking requirements, such as serial number engraving and custom metal fabrication tasks.

Technical Specifications

Laser Power	20 W
Primary Application	Metal Engraving, Metal Marking, Serial Numbering, Industrial Fabrication

Design & Build

System Design

Compact Design • Integrated Workstation • Enclosed Cabinet

Included Components

- Monitor
- Control Panel
- Enclosed Cabinet
