

2.1 Channel Computer Speaker System with Subwoofer

This 2.1 channel computer speaker system provides enhanced audio for computers and other devices. It features a subwoofer for deep bass and satellite speakers for clear sound.

Overview

Immersive 2.1 Channel Audio Experience

This 2.1 channel computer speaker system is engineered to deliver a balanced audio profile, combining deep bass from the dedicated subwoofer with clear mid and high frequencies from the satellite speakers. Designed for versatility, it supports multiple playback methods including Bluetooth, USB, SD card, and AUX input, making it compatible with computers, laptops, and smartphones. The system features a modern aesthetic with an integrated LED display and convenient remote control for seamless operation in any workspace or home entertainment setup.
