

2.1 Channel Speaker System with Subwoofer

This 2.1 speaker system provides immersive audio with a subwoofer and two satellite speakers. Its compact design is suitable for various setups, delivering rich and clear audio.

Overview

Immersive 2.1 Channel Audio

This 2.1 channel speaker system features a dedicated subwoofer and two satellite speakers designed to deliver rich, clear audio for music, movies, and gaming. With a total RMS output power of 30W, the system provides a balanced sound profile with deep bass and crisp highs. Its compact footprint ensures it fits easily into various professional or home environments, while integrated controls allow for precise volume and bass adjustments.
