

2.1 Channel Speaker System with Subwoofer

This 2.1 channel speaker system provides immersive audio. It features a central subwoofer and two satellite speakers.

Overview

Immersive 2.1 Channel Audio

This 2.1 channel speaker system is engineered to deliver a balanced audio experience, combining a dedicated subwoofer for deep, resonant bass with two satellite speakers for clear mid and high-range frequencies. Designed for versatility, the system supports multiple playback sources including USB, SD card, and FM radio, making it a flexible solution for desktop environments. With a wide frequency response and low distortion, it provides high-fidelity sound suitable for both entertainment and professional multimedia use.
