

# 2100W Electric Wood Router with 12mm Collet

This electric router is equipped with a 12mm collet and a powerful 2100W motor. It is designed for precision woodworking and routing applications.

## Overview

### High-Performance Wood Router

This 2100W electric wood router is engineered for precision woodworking, offering robust power for demanding routing applications. With a versatile speed range and a 12mm collet, it is capable of handling intricate designs, decorative edges, and deep grooves with ease. Designed for professional use, this tool combines durability with ergonomic handling to ensure consistent results in various wood projects.

## Performance Metrics

### Input Power

**2100 W**  
Power

### No Load Speed

8000-23500 min-1

## Technical Specifications

### Voltage/Frequency

- 110-120V / 50-60Hz
- 220-240V / 50-60Hz

### Chuck Size Diameter

12 mm

### Max Plunge Depth

55 mm

## Packaging

### Packaging
