Product Overview

High-Efficiency Thermo Ventilator

This advanced 2100W thermo ventilator features a powerful PTC heating system capable of raising room temperatures by 20 degrees within just three minutes. Designed for professional environments and residential use, it utilizes a sophisticated 5-dimensional mute system to maintain noise levels at a quiet 36dB. The unit integrates heating, ventilation, and lighting into a single, durable, and fire-resistant ceiling-mounted assembly.

Integrated Functions

Heating • Ventilation • Illumination

Technical Specifications

Construction Details

- High-quality engineering plastic body
- Maintenance-free pure copper motor
- Oblique and annular air duct design
- Flush-mount ceiling integration

Safety Certifications & Protections

Flame-retardant Materials, Thermal Fuse Protection, 95°C Overheat Shutdown, Intelligent Temperature Control
