

210A Inverter ARC Welding Machine

This compact inverter ARC welding machine is designed for diverse welding applications. A digital display allows for precise control and monitoring of welding parameters.

Product Overview

Professional Inverter Welding Solution

This compact and powerful inverter arc welding machine is engineered for versatility across a wide range of welding applications. It features an integrated digital display that allows for precise control and real-time monitoring of welding parameters. Designed for both professional and DIY environments, the unit ensures stable and reliable performance, even under demanding operational conditions.

Technical Specifications

Rated Current

210 A

Rated Current

Input Voltage

220V

Cooling System

Yes

Features

Key Features

- Compact and portable design
- Digital display for parameter monitoring
- Stable arc performance
- Efficient cooling system

Suitability

Professional Use, DIY Projects
