

# 211cc Single-Cylinder Gasoline Engine

This is a 211cc gasoline engine with OHV. It is a single-cylinder, four-stroke engine with forced air cooling.

## Product Overview

### Compact Power Solution

This 211cc single-cylinder gasoline engine is engineered for reliability and versatility in portable power applications. Designed as a four-stroke model, it provides consistent performance for equipment such as lawnmowers, generators, and other small machinery. Its compact architecture and integrated fuel management features make it an ideal choice for demanding operational environments.

## Technical Specifications

### Engine Displacement

**211 cc**

Displacement

Engine Type	Single-Cylinder, Four-Stroke
Starting Method	Manual Start

## Features

Key Features	Fuel Shut-off Valve, Compact Design, Four-Stroke Cycle, Manual Recoil Start
--------------	---

## Applications

### Common Applications

- Lawnmowers
- Portable Generators
- Small Power Equipment
