

212L Top-Freezer Refrigerator with LED Lighting

This 212L refrigerator features an energy-saving design and LED lighting. Its three-width design and multi-air bag door gasket ensure excellent insulation and high cooling effectiveness.

Overview

Efficiency Meets Performance

The 212L Top-Freezer Refrigerator combines advanced polyurethane micro-cell foaming technology with a high-efficiency multi-air bag door gasket for superior thermal insulation. Designed for reliability, it features an intelligent environmental temperature transmitter that enables automatic operation based on external conditions. With its tempered glass mirror finish and integrated LED interior lighting, this unit offers a modern look while ensuring long-term energy savings.

Technical Specifications

Reinforced refrigerating pipe system with a deep drawer for improved freezing performance.

Integrated temperature transmitter for intelligent automatic climate compensation.

Capacity Details

212 L Total Net Volume	50 L Deep Freezing Volume	45 L Variable Temp Volume
----------------------------------	-------------------------------------	-------------------------------------

Power and Efficiency

Parameter	Value
Rated Input Power	90 W
Energy Consumption	0.47 Kw.h/24h
Star Rating	3

Design Features

Bright and energy-efficient white LED interior lighting system.

High-sealing capacity gasket prevents cold air leakage for better energy efficiency.

Key Features

Tempered Glass Panel, White LED Lighting, Removable Gasket, Automatic Temp Compensation, Deep Freezing Drawer
