

21.5 inch Automatic Hand Sanitizer Dispenser with Digital Signage

This automatic dispenser combines touch-free hand sanitization with a digital advertising display. The 21.5 inch LCD screen supports various media formats for displaying advertisements, announcements, or informational content.

ADDITIONAL IMAGES

Overview

A versatile self-service terminal combining hand disinfection with cloud-based advertising information release.

All-in-One Hygiene & Communication Solution

This 21.5-inch digital signage terminal integrates automatic hand sanitization with high-definition advertising to enhance public safety and engagement. Designed for high-traffic environments like hospitals, schools, and retail stores, it features touch-free dispensing and advanced epidemic prevention tools including temperature measurement and mask detection. The system supports remote content management, allowing businesses to broadcast vital information and advertisements seamlessly.

Display & Digital Signage

Supports flexible split-screen configurations to display videos, images, and text simultaneously.

Features a commercial-grade LCD screen protected by tempered glass and a durable sheet metal housing.

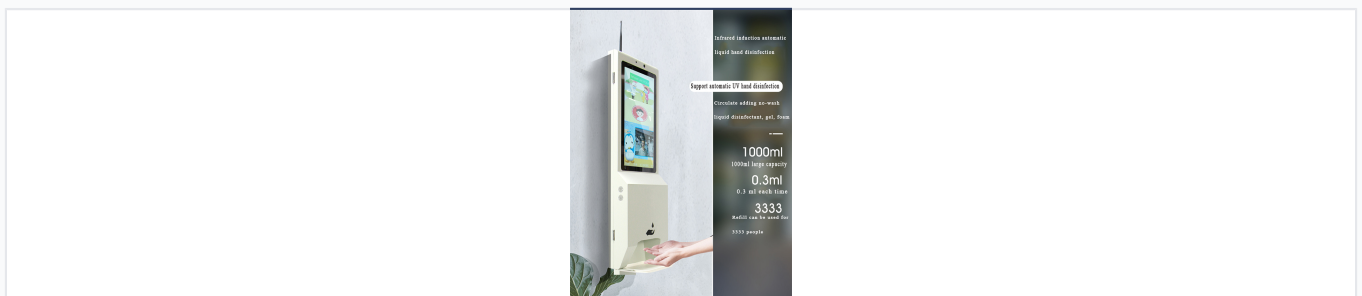

Screen Size
