Product Overview

Performance-Driven Truck Tire

The 215/75R17.5 tire is engineered for heavy-duty commercial applications, offering a balance of durability and reliable performance. Featuring a sophisticated horizontal block pattern, it delivers excellent driving force and reduced skidding for safer operation. Its robust construction is designed to resist stone entrapment and groove cracking, ensuring a longer service life even under demanding road conditions.

Technical Specifications

Key Design Features

- Horizontal block pattern for superior traction
- Large angle groove wall design
- Anti-stone entrapment geometry
- Optimized pattern arrangement for noise reduction
