

# 21L Portable DC Compressor Car Fridge Freezer

This 21L portable car fridge freezer features a DC compressor for efficient cooling. It is designed for travel, camping, and solar applications.

## ADDITIONAL IMAGES

## Overview

### Versatile 21L Portable Cooling Solution

This 21L portable DC compressor fridge freezer is engineered for high-performance cooling during travel, camping, and solar-powered off-grid applications. It features a high-density CFC-free insulation system and a robust DC compressor to ensure efficient temperature maintenance even in demanding environments. With its compact design and intelligent control features, it serves as a reliable cold storage solution for vehicles and outdoor enthusiasts.

## Key Performance Metrics

### Performance Highlights

**21 L**

Capacity

**1 °C**

Temp Accuracy

## Technical Specifications

Cooling System	DC Compressor Cooling
Power Source	AC, DC, Solar Compatible
Insulation	Foamed-in-place high density CFC free insulation

## Capacity & Storage

### Storage Capacity

- 15 Bottles
- 20 Cans
- 10 kg of goods

## Design & Features

Comprehensive feature overview showcasing the 21L capacity, LCD touch panel, and internal storage configuration.

### Smart Features

- Automatic temperature control
- Battery protection system
- Open door reminder alarm
- Door slowly drop system

### Interior Features

- Internal LED lighting
- ABS easy-clean plastic lining
- Removable wire baskets
- Movable pull-out diaphragm

### Physical Construction

- Concealed handle
- Durable plastic bottom
- Door tank groove design
- Blue and white matching box

### Noise Level

Low Noise Operation

### Control Interface

LCD Panel Touch Control
