

21V Cordless Drill with Variable Speed

This 21V cordless drill features a variable speed trigger and adjustable torque settings. Its keyless chuck allows for easy bit changes for drilling and driving applications.

Overview

High-Performance 21V Cordless Drilling Solution

This 21V cordless drill is engineered for both professional and DIY applications, featuring a high-efficiency brushless motor that offers three times the service life compared to standard motors. The ergonomic design includes a soft handle cover for a secure grip and an integrated LED light to ensure precision when working in dark environments. With its versatile torque settings and advanced battery protection, it provides a reliable and maintenance-free experience for demanding tasks.

Design & Ergonomics

Design Features

- Soft handle cover for easy grip
- Integrated LED work light
- Compact and ergonomic design
- Keyless chuck for quick bit changes

Protection

Durability & Protection

- ECP (Electronic Cell Protection) for extended battery life
- Brushless motor for reduced wear
- Maintenance-free operation
