

21W Brushless DC Motor 310V

This is a 21W brushless DC motor. It operates at 310VDC with a speed of 440rpm and a current of 0.244A.

Product Overview

High-Efficiency Brushless DC Fan Motor

This 21W brushless DC motor is engineered for reliable performance in fan applications. Designed for a 310VDC input, it provides a consistent speed of 440rpm to ensure optimal airflow. Its robust design and specialized configuration make it an ideal component for cooling and ventilation systems requiring long-term operational stability.

Technical Specifications

Rated Power	21 W
Input Voltage	310 VDC
Rated Current	0.244 A
Speed	440 rpm
Model Identifier	YDK21-6A6-1

Certifications

Compliance	CCC
------------	-----
