

22 AWG Paired Computer Cable

This paired cable is suitable for internal wiring and external interconnection tasks. It has a PVC sheath and insulation, along with a tinned copper conductor.

Product Overview

22 AWG Paired Computer Cable

This 22 AWG paired computer cable is engineered for reliable data transmission and signal integrity in demanding environments. Featuring a robust PVC sheath and insulation, it is designed to meet strict safety standards including UL and CSA compliance. The cable utilizes high-quality plain or tinned copper conductors, making it a versatile choice for various industrial and commercial computer cabling applications.

Electrical Ratings

Rated Temperature	80 °C
Rated Voltage	300 V

Construction

Conductor Material	Plain Copper, Tinned Copper
Insulation Material	Colour-coded PVC
Drain Wire	Tinned or plain copper wires stranded

Compliance & Standards

Reference Standards

- UL Subject 758
- UL 1581
- CSA C22.2 No.210.2

Flame Rating

VW-1
