Product Overview

High-Performance Dryland Bulldozer

The 220HP standard dryland bulldozer is engineered for heavy-duty earthmoving, grading, and land clearing tasks. Featuring a robust drivetrain and a high-torque engine, this machine delivers excellent fuel efficiency and power reliability for demanding job sites. The cabin is designed with ergonomics in mind, integrating advanced monitoring systems to ensure operator comfort and productivity throughout long shifts.

Technical Specifications

Rated Power

131 KW
Rated Power

178 HP
Rated Power

Operating Weight

18.4 ton

Primary Engine

Weichai WD10G178E25

Secondary Engine Option

Cummins NT855-C280S10

Features

Operator Environment

- Ergonomic cabin design
- Adjustable driver seat and armrest
- Integrated air conditioning
- Automatic fault diagnosis
- Full machine monitoring system

Control System

Servo control, Soft shaft structure, Power shift transmission, Left-side shifting/steering, Right-side working device operation
