

220V 50Hz Rotary Compressor

This high-performance rotary compressor operates on 220V at 50Hz. It is suitable for use in refrigeration, air conditioning, and other industrial applications.

Overview

High-Performance Rotary Compressor

This high-performance rotary compressor is engineered for efficiency and reliability in demanding industrial environments. Designed to operate on a standard 220V, 50Hz power supply, it offers robust construction and an optimized design for smooth operation. It is a versatile solution suitable for a wide range of applications, including refrigeration and air conditioning systems, ensuring an extended operational lifespan.

Technical Specifications

| | |
|-----------------------|---|
| Voltage | 220 V |
| Frequency | 50 Hz |
| Suitable Applications | Refrigeration, Air Conditioning, Industrial Cooling |

Performance Features

Key Features

- Optimized design for smooth operation
- Robust construction for durability
- High-efficiency performance
- Extended operational lifespan
