

220V AC 4-Pole Magnetic Contactor

This 4-pole magnetic contactor is designed for switching electrical circuits. It operates at 220V AC and is suitable for use in air conditioning systems.

Product Overview

Professional HVAC Magnetic Contactor

This 4-pole magnetic contactor is a reliable solution designed for air conditioning systems and various motor control applications. Engineered for durability and consistent performance, it supports AC-3 duty and complies with international safety and quality standards. It is an essential component for switching electrical circuits in demanding HVAC&R environments.

Electrical Ratings

Performance Ratings

Voltage (V)	Rated Current (A)
220	18
380	18
600	12

Control Circuit Compatibility

380-415V 50Hz, 380-440V 60Hz, 220V 50Hz

Technical Specifications

Rated Insulation Voltage (Ui)

600 V

Insulation Voltage

Conventional Free Air Thermal Current (Ith)

32 A

Thermal Current

Standards & Certifications

IEC60947-4 • GB 14048.4 • ISO9001:2000

Ordering & Service

Service & Logistics

- OEM and ODM services available
- Free samples available for testing (shipping costs apply)
- 100% self-inspection and testing prior to packing
- 15-20 days delivery time after deposit
- Payment terms: 30% deposit, balance against B/L copy
