

220V DC Permanent Magnet Motor, 6000 RPM

This is a permanent magnet DC motor with a voltage rating of 220V. It has a speed of 6000r/min.

Overview

High-Performance DC Motor

This permanent magnet DC motor is engineered for reliable performance in demanding applications. Operating at a voltage of 220V, it delivers a high rotational speed of 6000 RPM. Its robust construction ensures consistent operation for industrial or specialized equipment needs.

Technical Specifications

Rated Voltage	220 V
Rated Speed	6000 RPM
Motor Type	Permanent Magnet DC Motor
Model Identifier	ZYT-80-05
Production Work Order	DQK020701
