

220V DC Permanent Magnet Motor 6000 RPM

This is a permanent magnet DC motor. It operates at 220V and has a rated speed of 6000 RPM.

Product Overview

High-Performance DC Motor

This permanent magnet DC motor is engineered for reliable performance in demanding applications. Operating at 220V, it delivers a high rotational speed of 6000 RPM, making it suitable for compact machinery and precision equipment. Its robust design ensures consistent operation for professional industrial use.

Electrical Specifications

Rated Voltage	220 V
Rated Current	0.5 A

Performance Metrics

Rated Speed	6000 RPM
Motor Type	Permanent Magnet DC Motor
Model Identifier	ZYT-80-05
