Product Overview

Clean Water Submersible Vibration Pump

The TVM series clean water submersible pump offers a compact, high-efficiency solution for irrigation, mine drainage, and flood control. Engineered for durability, it features a rugged aluminum body and robust rubber impeller, ensuring long service life in demanding environments. This versatile pump is easily transportable and suitable for use in rivers, lakes, and wells.

Technical Specifications

Maximum Head	60 m
Max Working Pressure	8 bar
Operating Temperature Range	0 to +40°C
Power Requirements	220V + 5% / 50Hz

Construction & Durability

Materials

- Aluminum pump and motor body
- Rubber impeller
- 45# steel motor shaft
