

220VAC DN20 Motorized Valve

This motorized valve operates on 220VAC, with a tolerance of +10%/-15% at 50/60Hz, consuming 6.5VA. It features a DN20 port and is rated for PN16 pressure.

Product Overview

Professional Grade Motorized Valve

This DN20 motorized valve is designed for reliable flow control in industrial and commercial fluid systems. Operating on a 220VAC power supply, it features a robust PN16 pressure rating suitable for demanding environments. The unit includes a manual override lever for emergency operation and a quick-release mechanism for easy maintenance.

Electrical Specifications

Operating Voltage	220VAC (+10% / -15%)
Frequency	50/60Hz
Power Consumption	6.5 VA

Mechanical Specifications

Port Size	DN20
Pressure Rating	PN16
Manual Override	Yes
Port Labels	A, B
