

225-260W Monocrystalline Solar Panel

This solar photovoltaic module features 96 pieces of 5" monocrystalline cells. It provides between 225-260W of power.

Overview

High-Efficiency Monocrystalline Module

This 225-260W monocrystalline solar panel is designed to provide high-efficiency energy conversion for diverse residential, commercial, and industrial applications. Built with 96pcs of 125x125mm cells, the module ensures robust performance and long-term reliability under various environmental conditions. It is engineered for seamless integration and easy installation, offering a sustainable and clean energy solution for modern power systems.

Technical Specifications

Rated Power Output

260 W

Maximum Power

Cell Configuration

96pcs 125x125mm 5-inch Monocrystalline Cells

Compliance

Certifications & Standards

TUV, IEC61215, IEC61730, CSA(C+US), UL1703
