

225cc Lawn Mower Engine

This 225cc engine is designed for lawn mowers and other outdoor power equipment. It features durable construction and an efficient cooling system for long-lasting performance.

Product Overview

High-Performance 225cc Lawn Mower Engine

This 225cc engine is engineered for demanding outdoor power equipment, delivering consistent power and reliability for both residential and commercial applications. It features advanced combustion technology and a robust cooling system to ensure stable operation and reduced emissions. Built with commercial-grade components like a forged crankshaft and cast iron cylinder liner, this engine is designed for an extended service life in tough landscaping conditions.

Technical Specifications

Displacement	225 cc
Engine Design	V-twin cylinder, Overhead V-valve (OHV), Dynamic balance crankshaft

Performance & Durability

Key Performance Metrics

225 cc

Displacement

2 stages

Oil Filtration Stages

Durability Features

- Commercial-grade cast iron cylinder liner
- Forged crankshaft
- Lock-clamp valve retention mechanism
- PVD-coated piston rings for wear resistance

Lubrication & Cooling

Full pressure lubrication • Forced air cooling • Oil cooling system

Operational Benefits

Feature	Benefit
Semi-spherical combustion	High power & low emissions
Dynamic balance crankshaft	Lower vibration & smoother operation
PVD coating	Improved fuel efficiency & reduced oil consumption
