

227IEC 52 RVV Electrical Wire

This is an electrical wire conforming to 227IEC 52 RVV standards. It is suitable for internal wiring of electronic devices and appliances.

Overview

Professional Grade RVV Electrical Wire

The 227IEC 52 RVV Electrical Wire is a high-quality multi-stranded conductor designed for reliable internal wiring in electronic devices and household appliances. It features a durable white insulation jacket that provides excellent protection and flexibility for various installation environments. Conforming to international 227IEC 52 standards, this wire ensures safety and consistent performance for professional B2B applications.

Technical Standards

Compliance Standards

227IEC 52 • RVV

Construction Details

Conductor Type	Multi-stranded
Insulation Color	White

Application

Recommended Applications

- Internal wiring of electronic devices
- Household appliance power cords
- General purpose electrical connections

Packaging

Packaging Format	Coil encased in clear plastic wrapping
