

## 228mm Acrylic Paint Roller Sleeve

This 228mm acrylic roller sleeve is designed for smooth and even paint application. The acrylic fibers ensure excellent paint absorption and release, minimizing drips and splatters.

### Product Overview

#### Professional Acrylic Roller Sleeve

This 228mm acrylic roller sleeve is engineered for consistent and smooth paint application on varied surfaces. Designed for reliability, the 10mm pile height and 850 density construction ensure excellent paint pick-up and even release. It is a durable solution suitable for professional painting projects requiring a high-quality finish.

### Technical Specifications
