

22kW Diesel Engine for Power Generation

This diesel engine is designed for power generation applications, delivering a rated output of 22kW. It incorporates a fuel injection system to ensure efficient combustion and reliable performance.

Product Overview

High-Performance 22kW Power Generation Engine

This diesel engine is engineered for reliable power generation, featuring world-leading mean effective pressure and power indicators. Its compact design ensures convenient installation and transportation, while advanced sealing techniques significantly reduce fuel consumption. Built for longevity, the engine offers an overhaul interval exceeding 10,000 hours, making it a robust choice for demanding professional applications.

Performance Metrics

Rated Power

22 kW

Rated Output

Overhaul Interval

10000 hours

Technical Features

Filtration Components

- CX0708 Fuel Filter
- JX0810 Fuel Filter

Durability Enhancements

High-frequency hardening, Piston ring sealing, Valve sealing, Fatigue strength optimization

Design & Build

Design Advantages

Compact Design • Easy Installation • Wear Resistant • Efficient Combustion
