Product Overview

High-Performance Ground Engaging Tools

The 22S Top Pin Tooth and Bevel Adapter are engineered for heavy-duty construction machinery, providing exceptional durability and wear resistance. This set features a specialized top pin design for secure attachment and a bevel adapter that optimizes penetration angles for efficient material handling. Designed for demanding environments, these components ensure stable performance and a long service life for excavators and loaders.

Technical Highlights

Key Features

22 S

Series Size

1 Top Pin

Attachment Type

Design & Construction

Design Benefits

- Optimized bevel angle for effective penetration
- Secure top pin locking mechanism
- Fine workmanship for precise fitment
- Stable product performance under heavy loads

Component Type

Top Pin Tooth and Bevel Adapter

Performance Specifications

Performance Attributes

Wear-Resistant, Heavy-Duty, High-Durability, Stable Performance

Applications

Compatible Machinery

Excavators • Loaders • Construction Machinery

Primary Applications

- Efficient digging
- Material handling
- Demanding construction environments
- High-impact penetration

Identification

Model Designation

Part Code	Description
22S	Standard Top Pin Tooth
22S-25	Compatible Adapter/Tooth Variant
