

230-250W Polycrystalline Solar Panel

This high-efficiency polycrystalline solar panel is designed for foreign engineering contracting. The panel offers a power output range of 230W to 250W and utilizes 60 polycrystalline solar cells.

Product Overview

High-Efficiency Energy Solution

This polycrystalline solar panel is engineered for reliability and consistent performance in both on-grid and off-grid solar energy projects. With a power output range of 230W to 250W, it utilizes 60 high-efficiency cells to maximize energy capture. Designed for durability, this panel is an ideal choice for large-scale engineering contracting and diverse solar applications.

Technical Specifications

Power Output Range

230 W

Minimum Power

250 W

Maximum Power

Cell Count

60 cells

Cell Technology

Polycrystalline

Application

Suitable Applications

On-grid, Off-grid, Engineering Contracting
